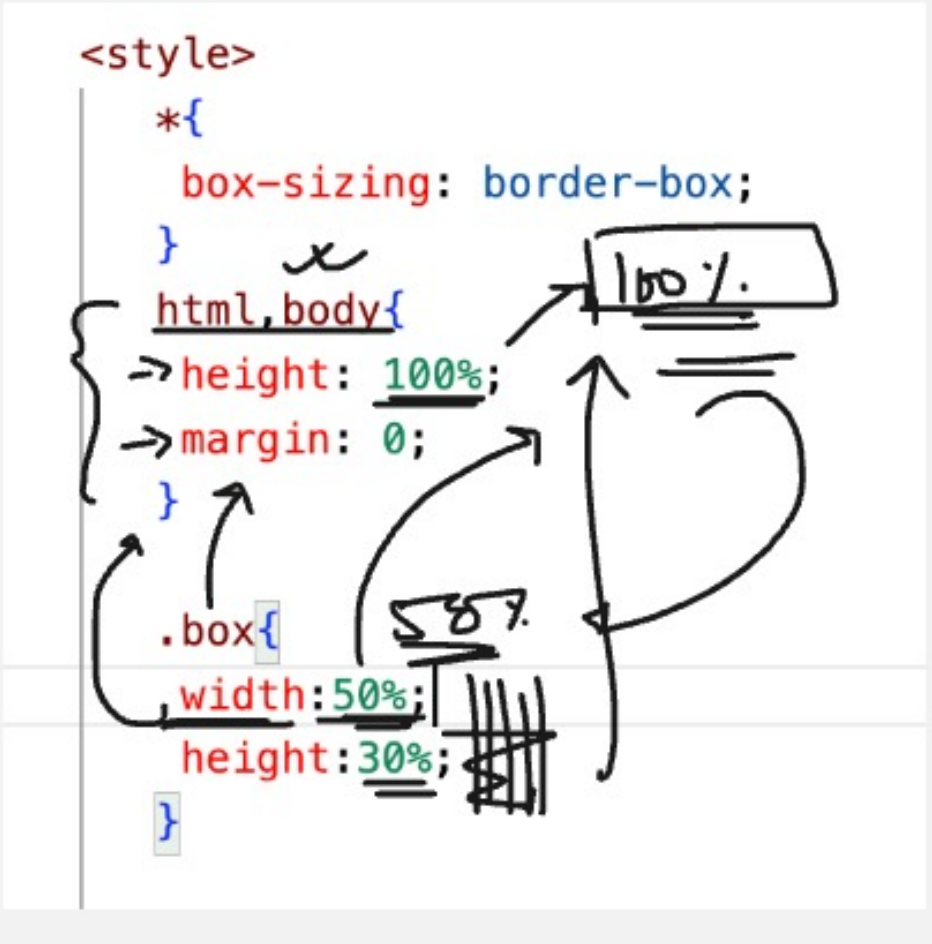
mobile
iPad
Laptop

px vs %

Device	Typical width
Small phone	360-375px
Large phone	390-430px
Tablet	768-834px
Laptop	1280-1440px
Desktop (Full HD)	1920px

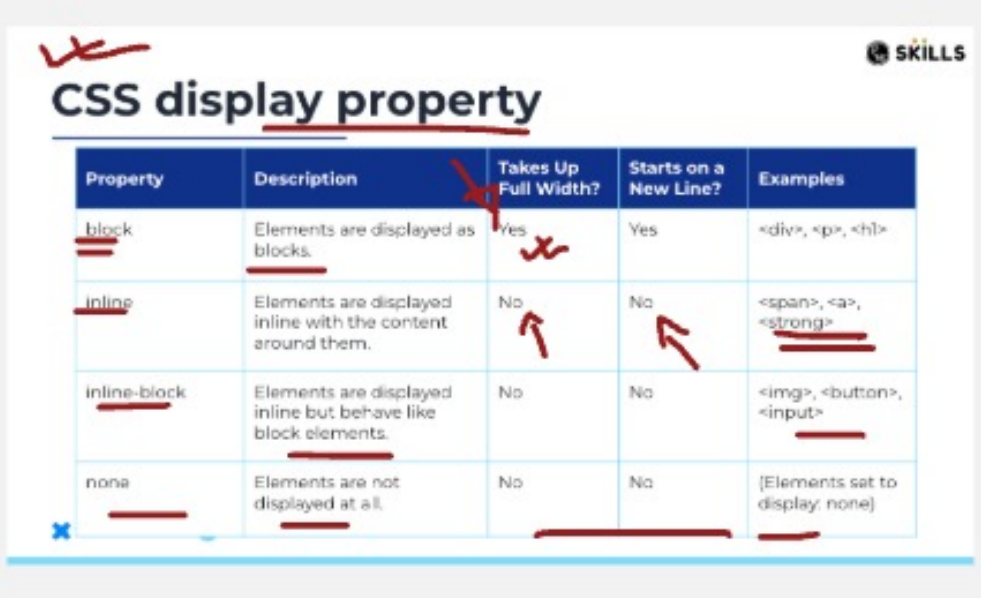
1005px

{"P"{"Width"}
50%



```
<style>
    *{
     box-sizing: border-box;
    }
    html,body{
    height: 100%;
    margin: 0;
    }

    .box{
     width:50%;
     height:30%;
    }
```



CSS display property

Property	Description	Takes Up Full Width?	Starts on a New Line?	Examples
block	Elements are displayed as blocks.	Yes	Yes	<div>, <p>, <h1>
inline	Elements are displayed inline with the content around them.	No	No	<span>, <a>, <strong>
inline-block	Elements are displayed inline but behave like block elements.	No	No	<img>, <button>, <input>
none	Elements are not displayed at all.	No	No	(Elements set to display: none)

inline-block: row level (with width/height)
inline : column level (ignored width)
block : row level (full width)
